

OneSort Pro® dimensioning and data capture

Parcel management that measures up.

OneSort utilizes automatic Address Block Locator (ABL) software for increased parcel induction efficiency.

Growth in online sales (\$ Trillions)

Source: eMarketer, Jan. 2014

Agility pays.

Ever-rising Internet sales make it an opportune time for shippers and postal organizations. But as parcel shipment volumes continue to climb so do the expectations for transparency and even faster delivery. The need to increase efficiency and accuracy are crucial to effective parcel management. The OneSort™ Pro data capture solution is designed to deliver both—in record time.

Automating multiple tasks.

OneSort parcel data capture offers a fresh alternative to the scanning, weighing and measuring of parcels by hand. There's no need to manually enter item characteristics and address information, a process that slows handling and invites human error.

Instant information.

The operator simply places the package on the scale under the camera head. OneSort captures weight, dimensions, barcode data and a digital image. The OCR software reads machine printed addresses as well as handwriting where supported. Instantly communicating with client business logic, OneSort automatically generates a printed label and operator instructions via a customizable user interface. The ability to instantly gather item data while enabling business logic automation will make OneSort essential to your parcel management strategy.

All the information you need for enhanced parcel management – in seconds.

A unifying intelligence.

The OneSort Pro® integrates seamlessly with virtually every major back-end system. Our Business Logic Processing (BLP) software powers all BlueCrest sorting solutions worldwide and provides the proven intelligence to connect the entire process. Designed to be a flexible platform, the BLP software readily accommodates custom applications and future business needs.

OneSort is versatile.

The OneSort Pro® excels in all types of environments, collecting vital data needed for outbound parcels to qualify for carrier or postal discounts, as well as item images for verification, tracking,

analysis and claim protection. Inbound operations use OneSort data to improve receiving, tracking, distribution and staff communication.

The OneSort Pro® is a complete parcel induction and management system:

- Instantly weighs and dimensions any shape with certified accuracy
- Scans barcodes and captures OCR data
- Facilitates intelligent service-selection, shipping and retail applications
- Dynamically prints labels and receipts
- Enables end-to-end positive piece level tracking
- Supports real time data communication for logistics planning

The OneSort Pro® workstation provides an all-in-one solution for mailrooms, warehouses and shipping centers.

Where industry-leading support meets successful outcomes

BlueCrest offers world-class support and comprehensive services that optimize your OneSort sorting system. You can count on BlueCrest Global Services to address your unique operational needs.

- Leverage the proven skills and expertise of our dedicated global team for best-in-class installation, integration and implementation services.

- Achieve optimal performance with industry leading technical and maintenance support.
- Ensure maximum system uptime through real-time insights and predictive analytics that enable our global experts to make informed decisions and quickly resolve performance issues.

OneSort systems instantly capture dimensions from virtually anything: boxes, flats, documents, poly-wrapped bags, mailing tubes and irregular shapes. It's ideal for exception processing or as a first step to full parcel automation.
