

# intimus PURE Q30 PRO air purifier

## Air purifier with HEPA 14 filter

### ENJOY FRESH AND HEALTHY AIR

By having an INTIMUS PURE Q30 PRO Air Purifier in your home, in your shop, in your office. It will reduce the risk of contamination for you, your company employees, your customers' visitors and collaborators.

Safely remove air pollutants such as viruses, bacteria, mites, tobacco smoke, pollen, dust... that can affect the health of people and animals.

Breathing healthy air and maintaining proper ventilation in the area where you live or work will reduce allergic conditions, respiratory diseases and spread of viruses such as SARS-CoV-2 (COVID-19).

The purifier has an elegant design and high performance features such as HEPA 14 filter, activated carbon filter, air quality indicator lights, intuitive display with Wifi connection, low noise level and low power consumption.

An excellent choice for health care.

HEPA 14 FILTER  
HIGH EFFICIENCY

ELIMINATION OF  
PM2.5

MULTI-FILTRATION

## Where to use intimus pure q30 PRO?

- Home, offices, meeting rooms, schools and universities.
- Hotels, bars, restaurants, pubs and leisure centres.
- Clinics, medical centres, physiotherapy centres and dentists.
- Laboratories, chemical and pharmaceutical industries.
- Nursery schools, geriatric homes, nursing homes...

UP TO  
30 M2

## With the intimus pure Q30 PRO purifier, you will eliminate:

- POLLEN, ALLERGENS, DUST, ODOUR, VIRUSES, BACTERIA, MITES.
- CIGARETTE SMOKE, VEHICLES, POLLUTION AND BAD SMELLS.
- MOULD SPORES, ALLERGENS AND POLLEN.
- CHEMICALS, GASES AND AEROSOLS.
- ANIMAL AND PET HAIR.
- HOUSEHOLD POLLUTION.
- FLOATING PARTICLES.

SMALL ROOMS

PERSONAL OFFICES

BEDROOMS

HOME OFFICE

EMISSIONS FROM CARS

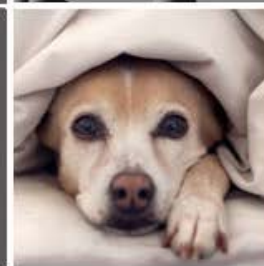

HOUSEHOLD POLLUTION

POLLUTION FROM INDUSTRIES

CIGARETTE SMOKE

PET HAIR

DUST AND FLOATING PARTICLES

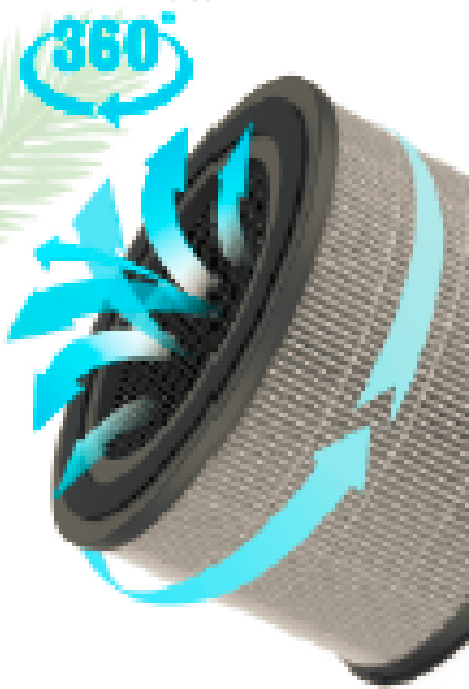

POLLEN AND ALLERGENS

# 3 types of purification

Facilitate an optimal level of purification.

**Aluminium Filter**  
Filters dust particles larger than 5 microns and can be cleaned many times.

**Active Carbon Filter**  
Rapid absorption of odours, decomposition of formaldehyde, benzene, ammonia, smoke.....

**HEPA 14 filter**  
Eliminates mould, dust, allergens, viruses, bacteria...

## What are HEPA filters? - "high efficiency particle arrester"

HEPA filters are a system for retaining volatile particles present in the air made up of glass fibres. These fibres are very fine and create a mesh-like structure that retains pollutants. the HP 14 filter is the most efficient in the retention of pollutants.

## The importance of the type of HEPA filter

The European standard EN 1882 evaluates the filter filtration performance for the MPPS and indicates that there are different categories of filters among which are the P HP filters. These filters measure particle retention from lowest to highest capacity. Classes E10, E11 and E12 are EPA air filters and H13 and H14 are HEPA filters. According to this standard an HP filter must remove a minimum of 5% of particles with a size of 0.3 m or larger.

The Intimus Pure range of purifiers use HEPA H14 filters with a higher quality and efficiency in particle retention of 99.99% being the most efficient in the EPA & HEPA filter group.

FILTER TYPE	PURIFICATION EFFICIENCY	NO. OF PARTICLES PENETRATING	PERCENTAGE OF PARTICLE PENETRATION
EPA 10	≤ 85%	15,000 out of 100,000	≤ 15%
EPA 11	≤ 95%	5,000 out of 100,000	≤ 5%
EPA 12	≤ 99,5%	500 out of 100,000	≤ 0,5%
HEPA 13	≤ 99,95%	50 out of 100,000	≤ 0,05
HEPA 14	≤ 99,995%	5 out of 100,000	≤ 0,005%

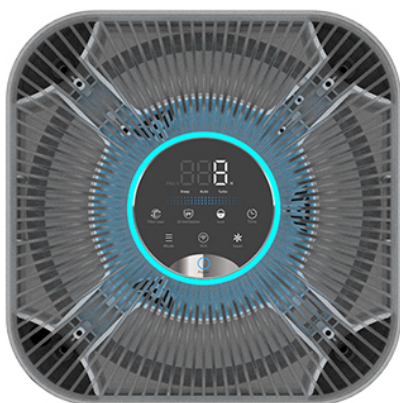

# Advantages and benefits

Smart and easy to use

## Maximum ease of use

- Easy to use and intuitive touch screen.
- Mobile application with download from the main platforms.

## Functionality and security

- Child safety lock.
- Sleep function with low noise level.
- Time-of-use programmer.

## Purifier Humidifier intimus PURE Q30 PRO

### Technical specifications

- Purifier with elegant design and high performance.
- 3 types of filtration: Aluminium pre-filter, Active Carbon, and Hepa 14 filter.
- Suitable for rooms up to 30 m<sup>2</sup>.
- Room purification time 10-12 minutes.
- CADR (Cleaning air capacity) 280 Mt<sup>3</sup>..
- Very low noise level.
- UV sterilisation.
- Intelligent air quality sensor.
- Touch control panel.
- Mobile application.
- Wifi connection.
- Time-of-use programmer. 1 / 2 / 4 / 8h
- Night function (Sleep Mode).
- Variable speed control.
- Child safety lock.
- Dimensions: 220 x 220 x 370 mm
- Weight: 2.8 kg.
