

MOBILITY

MOBILITY RETHOUGHT

OPERATIONAL CONTROL OF FLEETS AND VEHICLE POOLS

Order tracking in the car trade

GPS-supported fleet management
and pool vehicle management

24/7 service station

As the fleet manager, you want to organise your entire fleet in an audit-proof, time- and cost-saving manner, yet keeping the highest degree of flexibility? At the same time, you want your employees and customers to be mobile whenever they want to be?

Our mobility portfolio is comprehensive and modular at the same time. It can be integrated into your IT environment or as a cloud solution including apps. Whether commercial administration, electronic driving logbook, pool car disposition or car sharing models.

You rely on electromobility and integrated charging management - so do we. The digital driver's logbook and electronic driving licence control are of course also part of the package. In addition, we provide stationary handover solutions and mobile alternatives.

YOUR BENEFITS

Service available 24/7

Individual authorisation concepts

Contactless and secure handover of vehicle keys

Non-stop overview of availability and utilisation

Automated management of vehicles

No hidden costs

VEHICLE KEY MANAGEMENT AND ORDER TRACKING IN THE CAR TRADE

Personnel-free collection and return of vehicle keys and efficient processing of internal orders at the car dealers'.

In the busy daily rhythm of car trade, there is no time to search for keys for demonstration cars, new cars, used cars, customer vehicles, rental vehicles or service vehicles. Vehicle keys should always be within reach for employees and yet protected from unauthorised access. Desk drawers are rather unsuitable for this purpose.

With KEMAS, internal orders are monitored digitally from delivery to sales or during service. The system can be linked to the Dealer Management System (DMS) of the car dealer via an interface. Your keys are securely stored in a place that is quickly and easily accessible to all employees as well as other authorised persons. In addition, you record the movements of the vehicle keys across all areas and can easily track the order status.

By specifying the parking space, you can also find the right vehicle in your spacious outdoor area.

FEATURES & BENEFITS

Access authorisations

Monitored and transparent access for employees and external service providers.

Current key status

You know where which vehicle key is at all times and thus avoid long search times.

Vehicle key log

Complete documentation helps you prevent manipulation, loss and theft.

Flexible vehicle handling

Satisfaction of service department and customers.

Integration into car trade processes

Open interfaces to dispatching systems avoid doubled data maintenance.

High-quality hardware

Vehicle keys are protected against unauthorised access in the robust and high-quality systems.

ALSO INTERESTING:

What if you could also get your service providers on board?

You can also provide access to the system for reconditioners or employees of technical inspection authority. You save time and resources when handing out and collecting the vehicle keys and you can fully focus on your customers.

GPS-SUPPORTED FLEET MANAGEMENT AND OPERATIONAL POOL CAR SCHEDULING

Fleet&Easy - your perfect mobility solution from a single source

Manage your entire fleet in an audit-proof, time- and cost-saving manner - the new KEMAS mobility modules make this come true. In just one system you will find your contract data, documents, fuel receipts and vehicle pictures at your fingertips. Plus usage and utilisation analyses of your fleet. You can trace damage or integrate rental vehicles. This gives you a full overview of your costs.

From fleet manager to mobility manager: You control the use of all types of mobility in your company from one system - from departmental, company, service and pool vehicles to e-bikes and public mobility services.

Lead your fleet into the digital future without any stress - completely „fleet&easy“.

FEATURES & BENEFITS

Digital vehicle file

You really have all your data in one place.

Full cost control guaranteed

You will have an overview on all vehicle costs at any time.

Convenient appointment management

You will be reminded automatically of all important appointments.

Automate work processes

No need for duplicate data maintenance.

Reliable driver recognition

Based on the driving license, the system recognizes the driver.

Easy-to-read dashboard

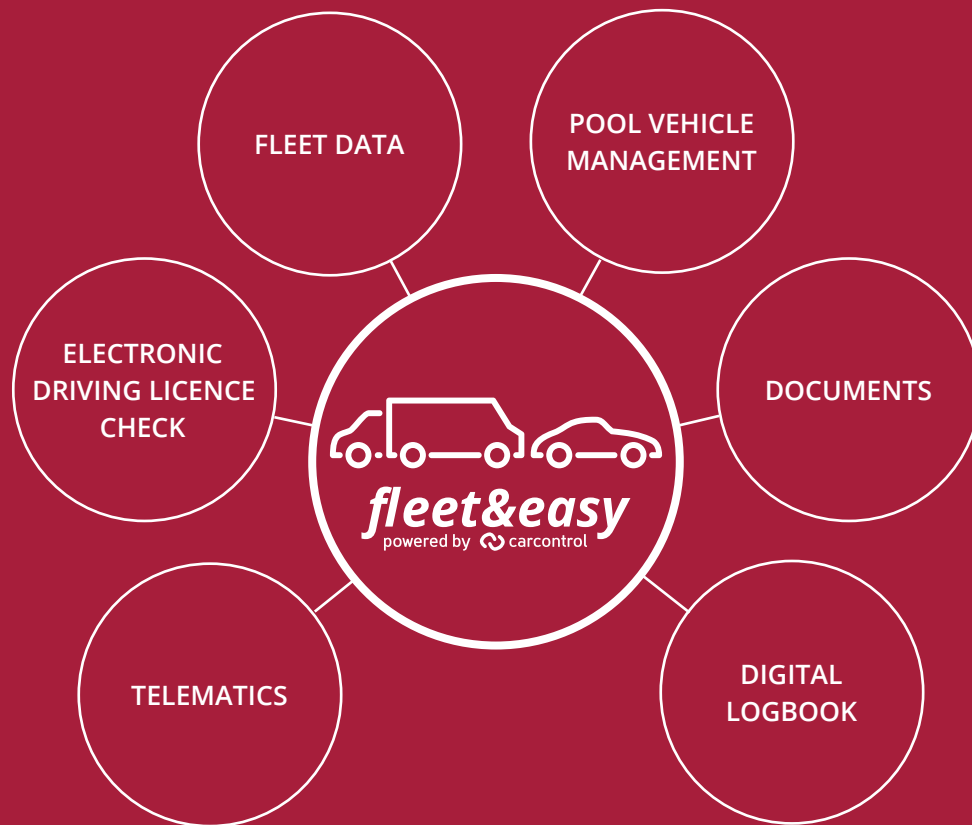

All fleet metrics and reporting at a glance.

MAKE AN END TO ...

... indefinite Excel sheets, overflowing folders or handing keys over by hand!

Book your mobility on the web, in an app or directly at the terminal! Available on premise or as software as a service.

YOUR PERFECT MOBILITY SOLUTION WITH 6 SELECTABLE FUNCTIONS

Only pay for what you really need

Fleet data

Here you manage all fleet data. You can import vehicles from existing systems or create new ones. Optionally, you can track damage or make arrangement for tyre changes and service.

Electronic driving licence check

It helps to ensure compliance with the legal liability of owners according to § 21 Road Traffic Act. Define your individual inspection dates according to your company policy. The driver and fleet manager are automatically notified about the inspection date.

Documents

Keep your images and documents at one place and avoid the hassle of searching through different folders.

Telematics

With the help of telematics, you can easily check the charging status of your electric vehicles, for example.

Digital logbook

The digital driver's logbook differentiates between private and business trips at just one touch and prevents data gaps - data protection compliant according to the guidelines of the tax authorities.

Pool vehicle management

Optimise your fleet to avoid long idle times and thus reduce costs. Usage and utilisation analyses help you to achieve this.

OPERATIONAL POOL VEHICLE MANAGEMENT

Automated pool management and streamlined operational processes

As a fleet manager, you want to make sure that all employees are mobile at all times. At the same time, however, you need to keep an eye on profitability and do not want to be unnecessarily burdened with administrative tasks. It's not an easy job, doesn't matter if we talk about five or 500 vehicles.

With KEMAS you can automate user and administrator processes. Employees book their mobility preferences themselves, either at their place of work or at the terminal. The software ensures optimal scheduling and the best possible utilisation of your fleet, even across locations. The issue and return of vehicle keys and documents are carried out around the clock and without staff via the key terminal. Any damage that has occurred or the location of the parking space can also be checked here. With professional pool vehicle management, you can optimise time-consuming organisation and thus save on process costs.

FEATURES & BENEFITS

24/7 availability

Contactless handover of vehicle keys and other resources at all times.

Reservation platform

Book your mobility on the intranet, online or at key terminal.

Permanent overview

You keep an overview of vehicle availability and utilisation at all times.

Electronic logbook

Thanks to the complete documentation, you can as well trace damage, for example.

Optimal dispatching

Vehicles are automatically allocated according to your optimisation criteria.

Dashboard

All fleet key figures and reports at a glance.

KEMAS Service Station

24/7 SERVICE STATION

Customer service with added value

Reduce your customers' waiting time and increase customer satisfaction - regardless of whether they have made a service appointment, want to take a test drive or rent a vehicle. With a service station on site, your customers can drop off and pick up their vehicle flexibly, even in the evening or at the weekend.

With our solution, you reduce the workload of your staff, especially during peak times, and it allows you to fully focus on customer care. At the same time, you can increase the capacity utilisation of your workshop.

The „round-the-clock opening“ allows you to generate additional orders, which you would not normally have received, e.g. through additional services offered or spontaneous customers.

FEATURES & BENEFITS

24/7 availability

Contactless and secure handover of vehicle keys and documents around the clock.

Replacement mobility

Rental vehicles can be booked online or directly on site.

Reservation platform

Book your service appointment conveniently online or at the self-service machine.

Pick-up station

Suitable to save customers a trip.

Avoid capacity bottlenecks

You have more time for customer advice.

Professional service

Strengthens customer loyalty to your enterprise.

BUSINESS EVEN OUTSIDE OPENING HOURS

Why not also offer your customers additional services via the contactless service station?

Towing service - In the event of a breakdown or accident, customers can have their vehicle delivered to you even at night, conveniently initiate an order and leave the vehicle key securely in the terminal.

Replacement mobility - Does your customer need a replacement vehicle for the journey home after towing? No problem. Simply make your rental vehicles available in the system.

ABOUT INTIMUS & KEMAS

INTIMUS has many years of experience in optimizing customers mail management & office processes with high quality solutions and highly professional Sales & Service teams. Thanks to the collaboration with KEMAS who is a German company located in Oberlungwitz and one of the leading suppliers in the field of customer- and employee-operated handover automation solutions based on RFID technology we take the next step introducing the process-oriented self-service solutions for the transfer of company assets (e.g. keys, mail, parcels, work equipment, tools, textiles, weapons, etc.).
